

ENL Agri Limited Sustainability Pledge

At ENL Agri Limited, we believe that sustainability is more than a trendy word but it's a way of life. We recognize that our actions have a significant impact on the environment, the livelihoods of those around us and the economy. We are therefore committed to operating our business in a manner that promotes sustainable agricultural practices, with a focus on the protection of our natural resources and the surrounding communities.

As such we pledge to:

1. Adopt sustainable agricultural practices that respect the environment and promote biodiversity. We will minimize the use of harmful pesticides by using sustainable farming techniques that safeguards the environment and its natural resources.
2. Endeavor to reduce waste through recycling and waste reduction measures that minimize our environmental footprint and promote responsible waste management.
3. Preserve natural resources as we acknowledge that resources such as water and soil, are a necessity for our business activities, and we commit to managing them sensibly.
4. Foster a culture of transparency and accountability by adhering to the latest Bonsucro Production Standards and regularly sharing our sustainability practices and progress with relevant stakeholders.
5. Promote social and economic equity by working to support and strengthen local economies, providing fair wages and safe working conditions for our employees, and collaborating with other stakeholders to address social and environmental issues.
6. Continuously seek out new and innovative solutions to improve our sustainability practices and reduce our environmental impact, while maintaining the highest standards of quality and productivity.

We believe that a commitment to sustainability is not only critical for the health and well-being of our planet but also essential for the long-term success of our business. We will continue to prioritize sustainable practices in all aspects of our operations and strive to inspire others to do the same.
